

NADA EL-TORGOMAN

Flutter Developer

+20 109 108 4009 | Port Said, Egypt | github.com/nada-eltorgoman | linkedin.com/in/nadaeltorgoman

SUMMARY

Flutter developer with 2+ years of experience building and maintaining production cross-platform mobile applications using Bloc/Cubit and REST API integrations. Experienced in delivering enterprise features — attendance systems, task management, invoicing, and location-based services — with a focus on clean architecture and reliable user experience.

WORK EXPERIENCE

Mobile App Developer | Logic System

May 2026 – Present

Port Said

- Maintain and enhance the Inlink Flutter application, an enterprise system for factory operations, sales-rep task management, and customer relationships, resolving complex production issues and optimizing user workflows
- Build features for sales & purchase invoicing, returns, payments, warehouse requests, attendance verification, GPS validation, and device authentication
- Converted the Port Said Souq e-commerce platform (portsaidsouq.com) into client and vendor Flutter apps using the Prime Web framework

Programming Instructor | Eyouth (DECI)

Apr 2026 – Present

Port Said

- Deliver technical instruction and assessments for students aged 13–18 in Web Development, Cybersecurity, Python, and Computer Fundamentals

Mobile App Developer | TECFY

Apr 2025 – Mar 2026

Port Said

- Developed and maintained multiple production Flutter applications, including Tecfy Tickets, Tecfy Attendance, and Bana
- Contributed to development on the KACST project

Mobile Development Instructor | British Council & Maharat Masr

Oct – Nov 2024

Creativa, Port Said — Hybrid

- Delivered hybrid Flutter training for beginner developers
- Guided participants through building and deploying their first mobile applications

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Java, Kotlin, Bloc/Cubit, Hive, MVC/MVVM

Backend & APIs: PHP, Laravel, Firebase, REST API Integration, Admin Panels

Integrations: Google Maps, Payment Gateways (Paymob, PayPal), Push Notifications

Web: HTML, CSS

Tools & Platforms: GitHub, Figma, Jira, Postman, XAMPP, Cisco Packet Tracer

Operating Systems: Windows, Linux Mint, Ubuntu

IDEs: VS Code, Android Studio, IntelliJ, NetBeans, Eclipse

EDUCATION

Bachelor's Degree, Computer Science | Suez Canal University

Sep 2020 – Jul 2024

Computers and Information — Ismailia — Grade: Very Good with Honors

FEATURED PROJECTS

Inlink | Factory & Field Operations Management System

2026 – Present

- Organizes factory work and daily operational workflows
- Manages sales/field reps and their assigned tasks
- Handles sales and purchase invoicing, along with product returns and payments
- Organizes and manages customer accounts

Port Said Souq | E-Commerce Client & Vendor Apps

2026 – Present

- Converted the portsaidsouq.com website into two Flutter apps — a client-facing app and a vendor management app — using the Prime Web framework with a Laravel admin panel

Tecfy Attendance App | HR & Attendance Management System 2025

- Built attendance tracking, leave management, and overtime monitoring features
- Improved task visibility and employee workflow management

Google Play: Tecfy Attendance

SUMO App | Task & Operations Management System 2025

- Built task assignment, tracking, prioritization, and real-time updates, plus a caravan management system (booking, key tracking, room status)

Google Play: SUMO

Tecfy Ticket App | Internal Communication System 2025

- Built internal communication features and a campaigns system for targeted messaging and user segmentation

Google Play: Tecfy Ticket

CarSideAds App | Location-Based Advertising Platform 2025

- Built driver onboarding/verification flows and a location-based advertisement publishing system

Google Play: CarSideAds

Forme | Fitness & Wellness App Nov 2023 – Present

- Connects users with trainers, clubs, and courses; integrated Google Maps and the Paymob payment system
- Built with a Django backend and admin dashboard

GitHub: Forme

Food Delivery App | Delivery & Payment App Sep – Oct 2023

- Built with Flutter and a Laravel backend; integrated REST APIs, Firebase notifications, shopping cart, PayPal, and Google Maps

GitHub: Food Delivery

Travel App | Country Exploration App Jul – Sep 2023

- Built with maps and offline mode support, and a Laravel backend with authentication

GitHub: Travel App

Other Contributions: Contributed to Bana, ResilienzFitness, and KACST systems.

TRAINING & CERTIFICATIONS

Flutter Advanced Training | Information Technology Institute (ITI) Jun – Jul 2024

Ismailia

- Advanced Flutter, Clean Architecture, and SOLID principles; developed a movie app using Bloc and the TMDB API

Additional Training: Project Development Using Python — El-Masria Communications (2022) | Oracle SQL, Networking & Server Operations — PSCCHC (2021)

LANGUAGES

Arabic: Native Speaker

English: Intermediate (B1–B2)
